BC Nature Conference & AGM, May 2025 – Field Trip Descriptions

All field trips (unless specified below) will begin in the parking lot outside the Civic Centre to car-pool or walk. Look for the sign showing your field trip. Please be on time – latecomers might be left behind.

Friday/Saturday Field Trips Friday 23rd May: 1-4 PM. Saturday 24th May: 9-noon.

1	Pennask Lake Road - nature & photography
	Cancelled for Fri & Sat – this is now a Sunday farewell outing S04 – see below
	Leader: Murphy Shewchuk.
2	Lundbom Commonage - nature hike; not on trails (Fri & Sat) FRIDAY IS FULL Join naturalist Frank Ritcey on an "off-piste" walk in the grasslands of the Lundbom. We'll take in some excellent wetlands, a bit of the grasslands, and even make our way through a spruce grove. Good chance of getting your shoes wet so wear good hiking gear (shorts and flip-flops are not recommended). Moderate hiking. Pit toilets at the interpretation site.
	Leader: Frank Ritcey. One of BC's best-known naturalists, Frank was raised in the wilds of Wells Gray Park and has spent the better part of his life either out in nature or talking about it to whoever will listen. He's probably best known for his appearances on the CBC's popular <i>North by Northwest</i> broadcast with Sheryl McKay.
3	 Lundbom Commonage - grassland ecology (Fri only) We will visit the Laurie Guichon Memorial Grasslands Interpretive Site - Grasslands <u>Conservation Council of BC</u>, a diverse upper grassland site that is used regularly for youth and adult education. May is the perfect time to see the diverse plant communities and talk about grassland issues including invasive plants and managing grazing for healthy plant communities. Easy hiking. Pit toilets available. Leaders: Grasslands Conservation Council Directors Dennis Lloyd and Tom Dickinson, and GCC Executive Director Mike Dedels.
4	Kane Valley - birds & wildflowers (Fri & Sat) We have added space to these
-	outings on both Friday and Saturday. There will be 2 groups on both days.
	SATURDAY IS NOW FULL. Kane Valley is one of the gems of the greater Nicola Valley area. This outing will be a mix of driving to various locations and going on short hikes to observe birds, wildflowers and other wildlife in medium-elevation grassland, forest, and wetland ecosystems. Participants will observe a wide variety of birds, wildflowers and hopefully other wildlife species. Easy hiking. Pit toilets available.
	Leaders: Liis Jeffries & Paul Willms. Liis is a retired instructor at the Nicola Valley Institute of Technology (NVIT) where she taught Soil Science, Ecology and Biological Sciences. Paul is a retired forester who spent much of his career teaching Forestry and other related disciplines at NVIT.
5	Bioblitz & iNaturalist workshop (Sat) FRIDAY OUTING CANCELLED – SATURDAY STILL HAS SPACE

	Learn how to use the amazing iNaturalist app, or refresh your skills while participating
	in a Bioblitz at a rural property outside Merritt. The owner is in the process of re- wilding the property and this bioblitz will be a follow-up to one done by the Nicola Naturalists two years earlier at the same time of year. Make sure to download the iNaturalist app on your phone if you plan to participate in this workshop. Easy walking. No toilets.
	Leader: Julia Carr. Julia has joined the staff of BC Nature to work on the Municipal Protected Areas Program (MPAP). As a past member and team lead of the UVic/SFU-led BC Parks Biodiversity Program which uses iNaturalist to survey protected areas all over the province, she has had extensive experience with the app and with bioblitzes.
6	Lichens of the Nicola Valley (Fri & Sat)
	Introduction to Lichen beauty and lichenology at scenic Douglas Lake Ranch along Nicola Lake near Quilchena/Merritt. Provides an excellent opportunity to see rare lichens identified on rock and the soil biocrust. Participants will gain understanding of their special significance in the ecology of the Interior shrub-steppe/grasslands. 25 mins from Merritt, passenger car fine, to the site with opportunity for moderate difficulty. Walking a mix of easy (10 min walk through flat hayfield) with a moderately difficult 10 min sidehill scramble to see other lichens/biocrust. No toilets , bush only .
	Leader: Christine Rimmington . Christine is a lichenology enthusiast with Pacific Northwest Lichenologists, having independently studied Nicola Valley's diverse lichens the past five years.
7	Mushroom foray (Sat) FRIDAY OUTING CANCELLED – SATURDAY STILL HAS SPACE
	The forests of the Nicola Valley support diverse Fungi and spring is a good time to explore for them. We will discover and identify mushrooms in a wooded area near Merritt as we walk in a group. We don't need to go very far or fast, there is always lots to see if you take the time to look around. Easy walking. No toilets, except the bush .
	Leader: Michael Ebenal. Michael has been cultivating gourmet edible mushrooms since 2015 and has been interested in mushrooms since he first found them in the wild on his first camping trips. In 2018 he built a facility to take his cultivating hobby to the next level where he has the space and equipment to grow hundreds of pounds of mushrooms per month and to do research and development. Learning about Fungi and teaching what he knows takes up lots of his spare time when he isn't working as an industrial electrician.
8	Butterflies with Bob (Sat only) THIS IS NOW FULL
	Experience the weird and the wonderful - butterflying with Bob. We will explore forest service roads near Merritt that Bob will monitor for butterfly activity in the days before the outing, for the best viewing and photographic opportunities. Bob will also describe various butterfly quirks, that make butterfly hunts interesting, and some of the many attractants used to lure butterflies to specific locations. Hint, butterflies taste with their feet. Yuck !!! Easy walking. No toilets, except the bush.

	Leader: Bob Scafe. Bob is the Nicola Naturalist's moth and butterfly aficionado. He
	has been tracking down butterflies in the Nicola Valley for many years and knows the
	best places to find them.
9	Kentucky-Alleyne Provincial Park – toads, birds & hike (Fri & Sat)
	This outing is primarily a hike around Kentucky Lake – about 4.5 km of moderately
	easy walking through forest and open glades with views of the lovely emerald lake.
	Expect some interesting interior forest birds and wildflowers. We will also inspect the
	eco-culvert and funnel-fence that BC Parks and the Nicola Naturalists erected in 2012
	to funnel tiny Western Toad toadlets safely from their breeding pond into the forest.
	Moderate hiking. Pit toilets available in the park.
	S
	Leader: Ted Cederland. Ted is an avid hiker and outdoorsman and a long-time
	member of the Nicola Naturalists. He runs a construction company in Merritt and was
	one of the members who constructed the toadlet funnel-fence in 2012.
10	Beaver re-introductions in the Nicola Valley (Sat only)
10	We will visit a wetland restoration project in the Kane Valley that pairs beavers' role as
	ecosystem engineers with human-made facsimiles of beaver dams, termed "beaver dam
	analogues". This project is intended to boost watershed sponginess in light of
	numerous impacts to the hydrological integrity of the Nicola Watershed. The tour will
	include a gentle hike along an access road with good opportunities to see wetland-
	loving bird species and potential for seeing "nuisance" beavers that have been relocated
	to this site. Easy walking. Pit toilets available in Kane Valley.
	to this site. Easy walking. I it tolicts available in Kalle valley.
	Leader: Tom Willms. Tom is a fish and wildlife biologist and instructor at the Nicola
	Valley Institute of Technology in Merritt. He is one of the lead organizers of the beaver
	re-introduction program.
11	Extended birding - Lindley Creek-Midday Valley loop (Fri & Sat) FRIDAY IS
11	FULL
	We will drive this loop south of Merritt with frequent stops to bird the varied habitats,
	including mixed forest types, Nicola River, open glades, pastures and grasslands. This
	is an ideal location to see and hear birds of the BC Interior, including all three species

	Leaders: Dawn Brodie & Loretta Holmes. Dawn is a Registered Animal Health
	Technologist. She has worked for over 30 years to help conserve Burrowing Owl
	populations in British Columbia, and since 2016 at the Upper Nicola Band Burrowing
	Owl Reintroduction Program.
	Loretta is member of the Upper Nicola Band, and the band's Senior Cultural Heritage
	Resource Technician. She has a background in environmental monitoring, wildlife
	management and forestry that includes bird and mammal inventory surveys.
	Loretta and Dawn share Burrowing Owl monitoring and ongoing field research, and
	conduct owl presentations to local communities.
13	Minerals, fossils & geological history, Merritt area (Fri & Sat) FRIDAY IS FULL
10	The Nicola Valley offers great variety in geology and fossil sites. Mining has featured
	strongly in the town's history and economy. This is a driving tour within 15 km of
	Merritt, with limited walking on flat ground. Mostly stopping and pointing out or
	visiting geological features of interest and what they represent. Easy walking. Pit toilets <i>en route</i> .
	tonets en route.
	Leader Comme Sanford Comme is a lange noticed as all signal an einers with experience
	Leader: Gerry Sanford. Gerry is a long retired geological engineer, with experience
	in exploration, underground geology (including as a Shift Boss underground) and in
	open pit geology. He left geology after 18 years for other endeavours, but maintains an
	interest in the geology of the Nicola Valley.
14	Forestry in the Nicola Valley (Sat) FRIDAY OUTING CANCELLED –
	SATURDAY STILL HAS SPACE
	We will visit a forest site on Nicola Ranch property that butts against the city of
	Merritt. The area is a mature Douglas-fir stand that was select-logged by First Nations
	to prevent a runaway crown fire next to the City of Merritt. It is an example of how the
	risk of a potentially devastating forest crown fire can be eliminated by thinning with no
	net cost (the salvaged timber paid for the operation). Included is a First Nations
	culturally modified tree and an ancient hunting stand via a hike up a slope (80 metre
	vertical climb). The discussion will cover both good and bad logging practices in the
	BC Interior. Moderate walking. No toilets except the bush.
	Leaders: Norm Hansen & Chris Lepsoe. Norm is a retired Registered Professional
	Forester who has worked as a lead forester and forestry consultant for many decades in
	the Nicola Valley and surrounding areas. Chris Lepsoe is Registered Forest
	Technologist. He has worked in the forest industry in many capacities and was an
	instructor at the Nicola Valley Institute of Technology in Merritt for many years.
15	Sustainable ranching in the Nicola Valley (Fri only)
15	Many naturalists don't appreciate the value that ranchers bring to maintaining natural
	ecosystems and wildlife. As land owners and leasees of Crown Land, ranchers are
	custodians of much of the Interior grasslands and woodlands. Led by a prominent local
	rancher, this outing will visit beautiful Kane Valley to see and hear about sustainable
	ranching, issues around water management, local decision-making and much more.
	Leader: John Anderson. John was born and raised in the Nicola Valley and has been
	ranching here for decades. He has been active in numerous organizations such as the
	Grasslands Conservation Council. He is currently chair of the Nicola Watershed
	Community Round Table, that focuses on water and land management, chair of the
1	- Community Round Fable, mai rocubes on water and fand management, chall of the

	Indigenous Relations Committee for B.C. Cattlemens Association and president of
	Nicola Nordic Ski Club.
16	Tour & history of NVIT, recognition of First Nations people (Fri only)
	The senior administrators will lead a tour of the Merritt Campus of the Nicola Valley
	Institute of Technology (NVIT). The tour will cover the history of NVIT and its role as
	BC's Indigenous public post-secondary school. This is an excellent opportunity to learn
	about this unique Indigenous institute.
	Leader: Dr. John Chenoweth. Dr. Chenoweth is President and CEO of NVIT. He is a
	member of the Upper Nicola Indian Band (Syilx Okanagan Nation), has been part of
	the NVIT community for years, and is deeply committed to empowering Indigenous
	learners and revitalizing Indigenous languages.
17	Hamilton Commonage – ponds, wildflowers & birds (Fri & Sat) FRIDAY AND
	SATURDAY ARE NOW FULL
	We will drive into the grasslands via Nicola Lake and Pennask Lake Road. Hamilton
	Commonage has a diverse mix of forest, grassland, small lakes and ponds. We will
	visit sites where the Nicola Naturalists are monitoring Great Basin Spadefoots with
	autonomous sound recorders and weather sensors. The ponds support many breeding
	waterfowl and there are interesting grassland and forest birds, plus loads of
	wildflowers. Easy walking on moderately rough terrain. No toilets except the bush.
	whatte weist Eusy waiting on moderatery rough terrain rie tentes except the subit
	Leader: Alan Burger. A retired university prof and wildlife biologist, Alan is a keen
	birder, all-round naturalist and photographer, and president of the Nicola Naturalist
	Society.
18	Macro-photography workshop (Sat only)

	An outdoor workshop – we will meet at the Civic Center, talk about gear, and then do a walk of about 3 km along the Coldwater River and back, to view and photograph some spring flora and fauna. Folks don't necessarily need to have a macro camera, but bring one along if you have one. Otherwise try using a macro function on your phone. Easy walking. Toilets possible at parks along the way. Leader: Leanne Cleaveley. Leanne is an elementary school teacher/librarian and a photography enthusiast with a particular interest in macro images. She has written photography guides on a variety of topics and enjoys time outdoors. Her macro photos of insects and spiders have been a regular highlight at Nicola Naturalist meetings. Value-added use of logs & sustainable building (Fri only) We will visit <i>Nicola Logworks</i> at their Merritt production site. This innovative company leverages value from logs that many sawmills have difficulty using. Combined with robotic-assisted traditional style "piece en piece" technology this company excels at complex log and timber joinery. Their log and timber products are exported worldwide. Leader: John Boys . There are few people as qualified or as passionate as John to

20 River restoration to meet traditional Indigenous values (Fri only) OUTING CANCELLED
 Following the disastrous 2021 floods, there has been a strong focus on restoring the Nicola and Coldwater Rivers, which meet in Merritt, to a more natural and flood-resistant state. The STUWI(x) Naturalization Project is led by local community members and the six local First Nations, with funding from Merritt city and the provincial and federal governments. This outing will explore the restoration area and hear from the leaders of this unique project.
 Leader: Charlene Joe and others. Charlene is a member of the Lower Nicola Band. Sha is the Indigenous Engagement Manager with the city of Merritt and the chair of the

Leader: Charlene Joe and others. Charlene is a member of the Lower Nicola Band. She is the Indigenous Engagement Manager with the city of Merritt and the chair of the STUWI(x) steering committee. She and others in this committee will be leading the outing.

Night outings

Friday night (May 23rd): 8 – 11 PM. Meet in the Civic Centre parking lot at 7:45 PM to car-pool.

FN01	Moths and moth-sampling techniques THIS IS NOW FULL
	We will visit Bob Scafe's property on the edge of town, where he has already recorded over 800 species of moths. Here we will see several moth-collecting devices in action, including UV and pheromone traps, discuss sampling moths with photography and taking museum specimens, and view some of the local moth species. You will never look at a moth in the same way again! Toilet available .
	Leaders: Bob Scafe & Dr. Dave Holden. Bob is the Nicola Naturalist's moth and
	butterfly aficionado. Dave is a professional entomologist with the Canadian Food
	Inspection Agency, focused on studying moths across our province.
FN02	Owling in the Merritt area THIS IS NOW FULL
	Depending on the number of registrants we will organize one or two owling ventures
	close to Merritt. Likely areas are the forests and agricultural land along Lindley Creek
	Road and the upper Bench area bordering Merritt.
	Les deux TDA
FN03	Leaders: TBA.
FINUS	Great Basin Spadefoots at Pennask Lake Road THIS IS NOW FULL
	We will visit sites where Great Basin Spadefoots (a Threatened species in Canada)
	breed in grassland ponds. The Nicola Naturalists have been monitoring spadefoots
	here since 2011, lately using autonomous sound recorders matched with remote weather sensors. Owls and Poorwills are also likely to be encountered.
	Leader: Alan Burger.
	Leauer, Maii Durger,

Sunday Farewell Outings

Sunday May 25th 0900-noon. Instructions will be given to registrants on where to meet. Participants will likely use their own vehicles (*en route* to home) but car-pooling can be arranged.

KEEP CHECKING – we have added one new Sunday outing and we're working on adding more.

S01	Douglas Lake Plateau – grasslands and ranching
	This trip will explore the Douglas Lake high elevation grasslands, including the
	Douglas Lake Ranch (the largest ranch in Canada) and parts of the Upper Nicola Band
	reserve. These grasslands and associated forests and wetlands support diverse wildlife,
	including many rare species such as Badgers, Lewis's Woodpeckers, Great Basin
	Spadefoots and more. The focus of this outing will be to see how range management
	can benefit wildlife and natural ecosystems. Easy walking. Pit toilets at Douglas
	Lake campsite.
	Lake campsile.
	Leaders: TBA, but will include knowledgeable staff from the Douglas Lake Ranch.
S02	Hike the Coquihalla Pass forest
502	Beginning at the brake-check near the Coquihalla summit, we will hike into the forest
	and soon be away from the highway noise. This montane forest is a mix of coastal and
	interior species, with some impressive large trees and lush undergrowth. You might
	find Chestnut-backed Chickadees, Sooty Grouse and other coastal species. Moderate
	hiking – 2-4 km. Toilets at the brake-check.
	Leaders: Ted Cederland & Chris Lepsoe (see their information above)
S03	Birding at Tunkwa Lake Provincial Park THIS IS NOW FULL
	This high-elevation park in forest and grassland has two large lakes and several
	smaller wetlands. The lakes and ponds support dozens of species of breeding water
	birds, including some uncommon species like Eared Grebes, Red-necked Grebes,
	Ruddy Ducks and Yellow-headed Blackbirds. Rare shorebirds like Wilson's Phalarope
	and Black-necked Stilt have been found here in spring. A pair of American Herring
	Gull regularly breeds here – one of the southernmost breeding locations in B.C. Easy
	walking. Toilets in the park.
	waiking. Tonets in the park.
	Leaders: Alan Burger A retired university prof and wildlife biologist, Alan is a keen
	birder, all-round naturalist and photographer, and president of the Nicola Naturalist
	Society. Ken Lipinski is a keen birder and naturalist from the Kamloops Naturalist
	Club. He knows Tunkwa Park well.
S04	
504	Pennask Lake Road - nature & photography THIS IS NOW FULL
	Pennask Lake Road climbs up to a grassland plateau (1350 m, 4429 ft). in the heart of
	the Douglas Lake Ranch, Canada's largest cattle ranch. The route offers a look at the
	terrain as the receding glaciers left it revealing the gouges, ponds, drumlins and eskers
	plus the plants and wildlife that call this home. Most of the road is good gravel, but
	weather can add uncertainty to the trip. A four-wheel-drive vehicle with good
	clearance is preferred as well as three or four hours to spare. Easy walking. No toilets
	except the bush.
	Leader: Murphy Shewchuk. Murphy is a freelance writer/photographer/historian
	with a dozen published backroads books, including Coquihalla Trips and Trails
	covering our area. He has been exploring this area for over 50 years.
S05	Bluebirds of the Nicola Valley THIS IS NOW FULL

	In spring and summer the Nicola Valley is home to both Mountain and Western Bluebirds. Nowadays most of them use nest boxes maintained by numerous volunteers. This Sunday morning outing will take you to several places where we expect to find both bluebird species, and other users of the nest boxes like House Wrens and swallows. A chance to learn more about bluebirds and this important conservation initiative.
	Leaders: Yvonne Lord and others . The leaders are experienced volunteers with the Vancouver Avian Research Centre, which manages the bluebird nest box program in the Merritt area.
S06	Learn to sketch in nature ONE SPACE LEFT This is a workshop for people who think they can't draw, led by an artist who has taught many people the joys of sketching. Beginning with an indoor instruction session we will move out to do sketches in nature. Prepare to be amazed at what you can do! Try it once and you will know how forever. Discover a creative and relaxing way to enjoy nature.
	Leader: Jean Kiegerl. Jean is a Merritt-based artist who "accidentally" took an art class at university, which launched her long-time career and passion. Jean's paintings, sketches, prints and cards are well known in Merritt and beyond. She was an active member of Creative Company, the artisan/artist co-op in Merritt, is the past-president of the Nicola Valley Community Arts Council and was an "Active Artist" member of the Federation of Canadian Artists. See more at: www.kiegerl.ca
